Video Production Script Template

Please use the table below to plan your video.
Use the 'audio' column to add you script and the 'video' column to add information about the visual part of the script, i.e. what's happening, what would like to show.

Audio	Video
Write what should be said here	Are we watching a presenter or is this voiceover? Are there shots of buildings, events or activities we need to show?
If the audio naturally breaks into paragraphs, use a new section in the table.	Same goes for video – use a new section if we switch from footage of events back to the presenter etc.
